

# FROM IDEA TO DONE

## A Strong Partnership with Island Metal Craft

For Rainhouse Energy's REV-BESS project, Rainhouse Manufacturing Canada collaborated with our neighbours at Island Metal Craft to fabricate a custom rack to securely hold the EV batteries that power this revolutionary energy storage system. Island Metal Craft's expertise in metal fabrication has been instrumental in bringing Rainhouse Energy's vision to life.

The custom rack constructed by Island Metal Craft is the spotlight of this collaboration. This sturdy and meticulously crafted rack ensures that the heart of the REV-BESS is in capable hands. The fabrication process was completed swiftly, without compromising on quality, showcasing the skill and dedication of our partners at Island Metal Craft.

“ **BEING ABLE TO COLLABORATE ON THE DESIGN WITH THE FABRICATOR HELPED TO STREAMLINE THE MANUFACTURING PROCESS**

## A Brighter, More Sustainable Future

As the REV-BESS project moves forward, we are excited about the positive impact it will have on clean energy solutions. This collaboration with Island Metal Craft is a testament to our commitment to creating a cleaner and more sustainable future. Together, we are not only forging a strong partnership within our local business community but also contributing to a world powered by cleaner, more efficient energy.

Thank you for being part of our journey at Rainhouse Manufacturing Canada. Stay tuned for more updates on the Rainhouse Energy REV-BESS project and other exciting collaborations that are driving us closer to a greener tomorrow.
