

NEWSLETTER

As we set sail into a new year, the winds of change are propelling us towards exciting horizons. We are thrilled to shine a spotlight on the Centre for Ocean Applied Sustainable Technologies (COAST), a beacon guiding our region towards a thriving and sustainable blue economy.

Unveiling Pacific Canada's Hub for the Sustainable Blue Economy

COAST, a dynamic initiative under the South Island Prosperity Partnership (SIPP), is a collaborative force uniting the marine sector's diverse stakeholders. Entrepreneurs, corporations, academia, investors, and government entities join hands to strengthen our position in the vast and emergent blue economy.

In the spirit of collaborative innovation, COAST is on a mission to place Pacific Canada prominently on the global map of leading ocean hubs. COAST aims to be a catalyst for ocean and marine innovation in the Pacific Region, aligning with Canada's Ocean Supercluster strategy.

Diving into COAST

Vision:

COAST aspires to be Pacific Canada's hub for the sustainable blue economy.

Mission:

Driving inclusive prosperity in British Columbia's sustainable blue economy through entrepreneurship, innovation, and expansive partnerships.
