

## Canadian Manufacturers & Exporters (CME) Roundtable

Following our participation in the Western Innovation Forum, we continued our engagement with industry leaders at the Canadian Manufacturers & Exporters (CME) Roundtable on March 8th. Rainhouse's CEO Ray Brougham and Marketing Coordinator Bryanne Kitagawa joined the roundtable, reflecting our commitment to contributing to the growth and prosperity of British Columbia's manufacturing sector. Held at the VMAC facility in Nanaimo, a long-time client and valued partner of Rainhouse, this insightful discussion aimed to define an action plan to drive investment, create jobs, and grow exports in British Columbia.

## Raising Economy Conference 2024

Ray also had the privilege of participating in a panel discussion at the Raising Economy Conference 2024 on March 8th. The panel, titled "Lessons from Climate Leaders: A David Vs. Goliath Panel," explored the challenges and opportunities of championing climate solutions. Alongside other industry leaders, including Callum Campbell from Greenline Ferries, Amber Simpson from Alexzi Building Solutions, and Dominique Spragg, Ray shared insights into the importance of sustainable practices and the role of

businesses in shaping a greener future. The conference provided a platform for discussing sustainable practices and their impact on future economic growth.

At Rainhouse, we understand the significance of staying engaged with industry events and initiatives. These opportunities not only allow us to share our expertise but also enable us to learn from others and contribute to meaningful discussions shaping the future of manufacturing and sustainability.
