

The Engineering Showcase has grown over the years into a key event for the STEM community, providing invaluable opportunities for students and industry professionals to connect and collaborate. Following FIX IT 3491's outstanding performance at the 2024 Showcase, Rainhouse proudly sponsored breakfast for the team at the November Sidney Breakfast Club (SBC) meeting. This sponsorship reaffirms Rainhouse's ongoing commitment to bridging the gap between education and industry while fostering meaningful connections within the local community.

The SBC is a monthly gathering that unites professionals, innovators, and community leaders from Vancouver Island to foster collaboration and discuss advancements in manufacturing, technology, and industry. For FIX IT 3491, the event provided a fantastic opportunity to showcase their work and share their experiences with members of the Peninsula Advanced Manufacturing & Industry community. At the SBC meeting, six team members captivated attendees with their creativity, skill, and passion as they presented their robot and recounted their journeys in robotics.

"We would like to thank you for giving us the opportunity to present FIRST and the events we participate in. It was a great opportunity to get more companies interested in supporting high school robotics. The team learned important lessons in leadership and interpersonal communication skills. We appreciate the opportunity for connections that you gave us."

- KAI, MAX, RYAN, JASON, JASPER, LEO, FIX IT 3491

Rainhouse extends heartfelt thanks to John Juricic for hosting the SBC meeting, and to Christine Nicolls, FIRST Tech Challenge Affiliate Partner for BC, for organizing the FIX IT 3491 team's participation. Supporting initiatives like these aligns perfectly with Rainhouse's mission to inspire innovation and strengthen the local community.
