

SUPPORTING THE BLUE ECONOMY

Rainhouse has always been driven by innovation and a commitment to strengthening our community. This year, that commitment took shape in new and exciting ways. Rainhouse started out 2024 by joining the Centre for Ocean Applied Sustainable Technologies (COAST) – a beacon guiding our region towards a thriving and sustainable blue economy. This partnership reflects our dedication to fostering sustainable industries and supporting coastal communities.

COLLABORATING FOR INNOVATION

Another highlight of the year was our continued collaboration with LaFlesche, a partnership that reinforces our commitment to providing sustainable Made-in-Canada solutions from coast to coast.

Alongside this, our presence at key industry events—CANSEC, Western Innovation Forum, the Raising Economy Conference, CME events, and the Community Conference—allowed us to showcase our expertise while forging valuable connections across Canada.
