PROUDLY RAISING THE BAR: RAINHOUSE ACHIEVES AS9100 CERTIFICATION

We are excited to announce a monumental milestone for Rainhouse Manufacturing Canada Ltd.: our achievement of AS9100 certification!

AS9100 is a globally recognized quality management system (QMS) standard specifically designed for the aerospace, aviation, and defence industries. Built upon the foundation of ISO 9001, AS9100 includes additional requirements to meet the rigorous demands of these industries, ensuring the highest levels of quality, safety, and regulatory compliance. Achieving this certification underscores Rainhouse's unwavering commitment to delivering exceptional, reliable products and services to our clients.

WHAT IS AS9100, AND WHY DOES IT MATTER?

AS9100 goes beyond the basics of quality management. It is tailored to address the unique challenges of aerospace and defence, focusing on critical areas such as product safety, counterfeit parts prevention, and configuration management. This standard ensures comprehensive quality oversight across every aspect of an organization's operations, from design and development to production, installation, and servicing.

Being AS9100 certified is more than a badge of honor; it is a hallmark of global recognition. It demonstrates compliance with the highest standards of quality and reliability—standards often required by major aerospace and defence companies. Additionally, AS9100 emphasizes continuous improvement, helping organizations refine their processes, reduce
