Rainhouse manufactured first-level naval fasteners

Supporting Canada's Submarine Fleet

For more than a decade, Rainhouse has supported Canada's Victoria-Class submarine fleet through the Victoria In-Service Support Contract (VISSC). In partnership with Babcock Canada, Rainhouse manufactures first-level naval fasteners, delivers precision communications racks, and provides procurement support for one of Canada's most demanding defence programs. This experience has given Rainhouse firsthand insight into the quality standards, documentation requirements, and manufacturing discipline needed to support Canada's submarine fleet throughout its operational lifecycle.

Manufacturing first-level naval fasteners requires exceptional precision, rigorous quality assurance, and complete traceability.

These mission-critical components are manufactured to exacting defence standards because reliability is essential to the safe operation of Canada's submarine fleet. Combined with our experience manufacturing communications racks and providing integrated procurement services, Rainhouse has developed the expertise, quality systems, and disciplined manufacturing processes required to consistently support complex submarine programs.

Built on Proven Capabilities

- AS9100D and ISO 9001:2015 certified quality management systems
- Canadian Controlled Goods registration
- More than a decade supporting Canada's Victoria-Class submarine fleet
- Expertise in mission-critical defence and marine manufacturing

Looking Ahead

As the Canadian Patrol Submarine Project moves forward, opportunities will emerge across Canada's defence industrial base. Backed by more than a decade of experience supporting Canada's submarine fleet, Rainhouse stands ready to contribute its expertise in precision manufacturing, procurement, and quality-driven production while supporting Canadian content and supply chain participation.

Canada's next generation of submarines will be built through global expertise, Canadian innovation, and a strong domestic supply chain. Rainhouse is proud to support Canada's submarine manufacturing journey and looks forward to helping build the capabilities that will strengthen our country's defence and manufacturing sectors for decades to come.
