Celebrating 25 Years at Rainhouse

On September 24, we opened our doors for the Rainhouse Open House and celebrated 25 years in business.

We welcomed members of the community, local businesses, industry partners, and friends of Rainhouse to tour our facility and see our operations firsthand. Guests had the opportunity to watch live manufacturing demonstrations, meet our team, enjoy a BBQ, and learn more about how Rainhouse supports customers from design through production. The Open House also gave us an opportunity to talk about the manufacturing capabilities available right here on Vancouver Island.

Building a Stronger Local Network

Throughout Victoria Tech Week, we heard from many people who were surprised to learn about the advanced manufacturing capabilities available right here on Vancouver Island.

"It really highlighted the opportunity we have to build awareness around local manufacturing and show companies that they don't always have to look outside the region to find the capabilities they need."

Those conversations also reinforced the value of collaboration. Through the Vancouver Island Manufacturing Excellence Alliance (VIMEA) and its new partnership with VIATEC, Rainhouse is helping strengthen connections between Vancouver Island's manufacturing and technology communities, build local supply chains, and create new opportunities.

Thank you to everyone who connected with us during Victoria Tech Week and helped us celebrate 25 years of Rainhouse.
