September 2026

Connecting Through Victoria Tech Week

Rainhouse Manufacturing Canada Ltd. was proud to take part in Victoria Tech Week from September 21 to 25, 2026. The week brought together technology companies, manufacturers, innovators, industry partners, and members of the community to showcase the people and ideas shaping Vancouver Island's technology and manufacturing community.

For Rainhouse, it was a great opportunity to connect with new companies, reconnect with existing partners, showcase local manufacturing, and celebrate an important milestone: 25 years in business.

Connecting at COAST Ocean Tech Live

On September 23, Rainhouse joined ocean technology companies and industry partners from across B.C. at COAST Ocean Tech Live: Demo Day at Ship Point Pier in Victoria.

The event featured live demonstrations, new technologies, and opportunities to connect with companies working in the ocean technology sector. For Rainhouse, it was a great opportunity to meet new companies, learn more about the technologies they are developing, and reconnect with companies we have supported in the past by manufacturing parts for their products.

Events like COAST Ocean Tech Live give us a chance to strengthen existing relationships while building new ones with companies working to advance B.C.'s ocean technology industry.
